DETAILED ACTION

Response to Amendment

Claims 1-20 are pending in the present application.

Response to Arguments

Applicant's arguments filed August 24, 2001 have been fully considered but they are not persuasive. As addressed below, Bier et al. and Kajiwara et al. anticipated the claims.

In the present application the limitation "vector normal to a viewing surface" is defined in page 3, lines 11-14, as the transparency factor in one embodiment is a function of the angle of incidence formed by the intersection of the viewing surface normal vector with the object surface normal vector. Bier teaches a vector normal to a viewing surface (**col. 17, lines 56-67; col. 18; col. 19, lines 20-45; col. 20, lines 14-37; fig. 12-19, 22, and 25**). Bier teaches the anchor position of an object such as knowing the measurement of the rectangle corner underneath one, transparent command button. For example, figure 22 discloses the measurements of the viewpoint of the angles of an object then the angles are recorded and scaled. Furthermore, in figure 18, Brier teaches the transparency factor is disclosed by the rotation of the angles. Based on how the angle is rotated then the viewing is made possible to the users.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. This maintains the rejection of the prior action which is hereby incorporated by reference.
3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bier et al. (US patent no. 5,617,114) in view of Kajiwara (US patent no. 5,872,872).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
